WRITE A BLOG POST ON THE PREDICTIVE BRAIN LAB WEBSITE

First pick the image you want to use, use landscape orientation
To ensure correct dimensions and resolution we use photoshop

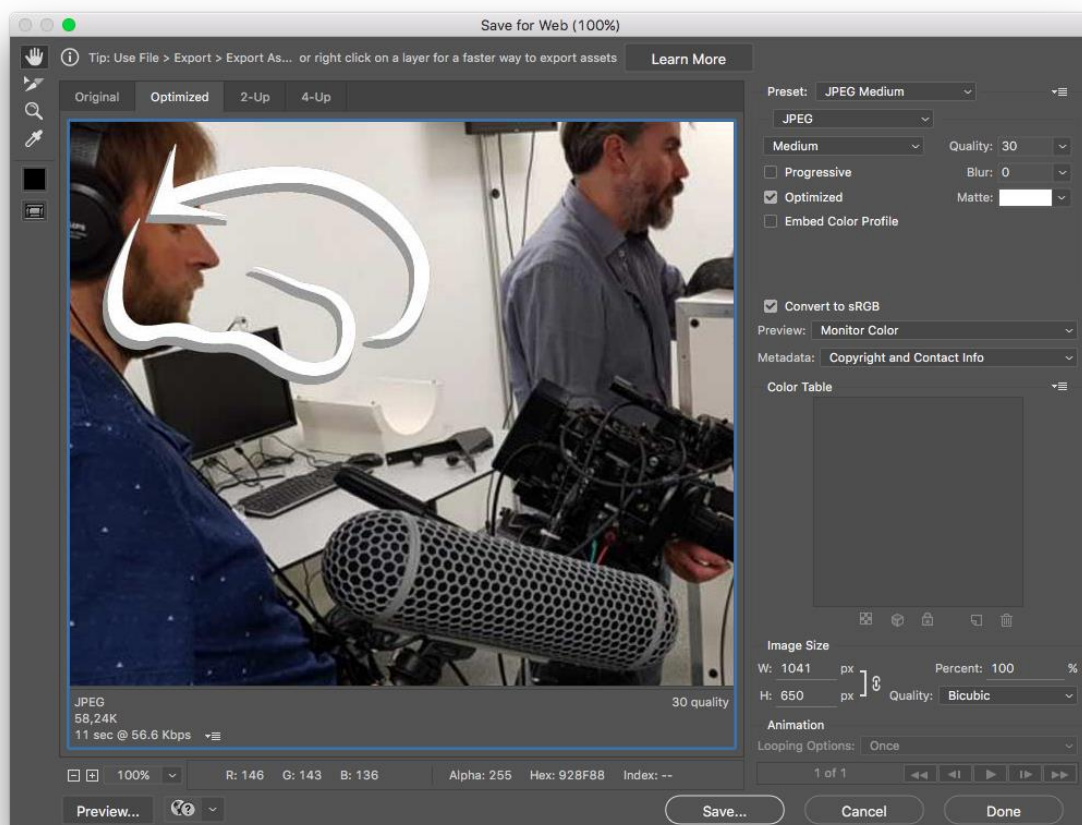

Open the psd file 'news_image.psd' in photoshop
And drag or copy paste your image in the file

Resize image appropriately
You can use a background if the image really does not fit.

Choose file>export>save for web (legacy)

Opt for jpeg medium
Check if file size is 1041*650 pixels

Save file on computer with easy to find name
(blogtype_blogsubject.jpeg)

use your predictivebrain lab link to login and go to
https://www.predictivebrainlab.com/wp-admin

go to post in left menu
and click on 'add new' at the top

or go directly to new post in top black bar which you should see when logged in:

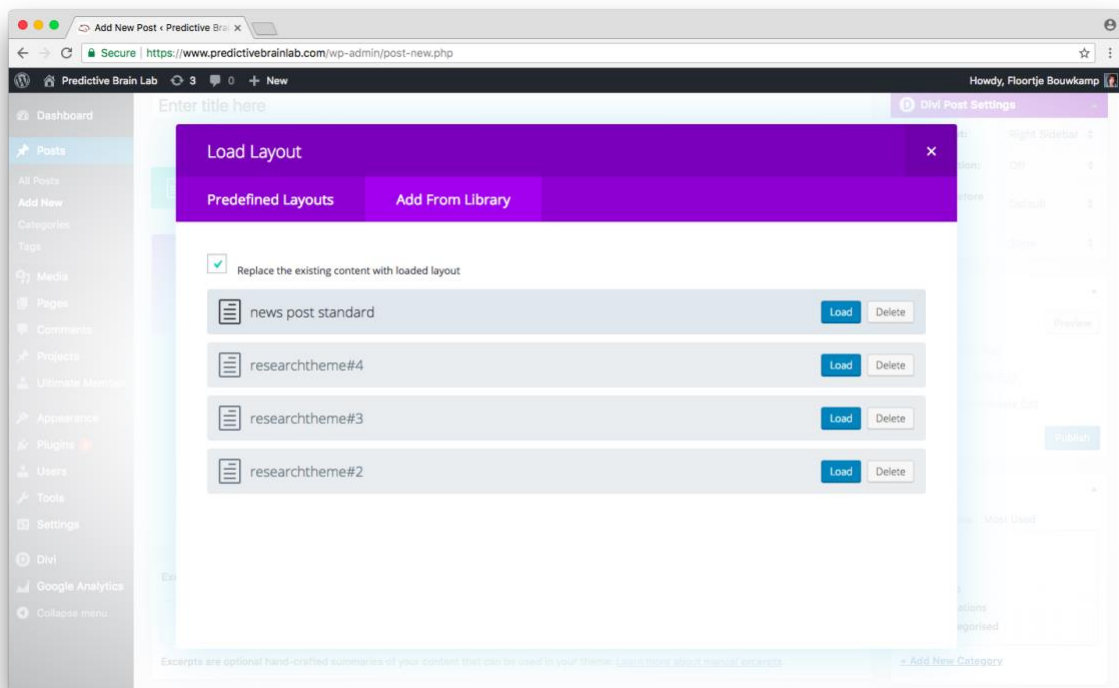

enter title of the post at the top
and choose button 'use divi builder'
this will change the configuration and you can now use building blocks

Choose 'Load from library" in the purple bar

Go to 'Add from library' and choose news post standard – click on load button

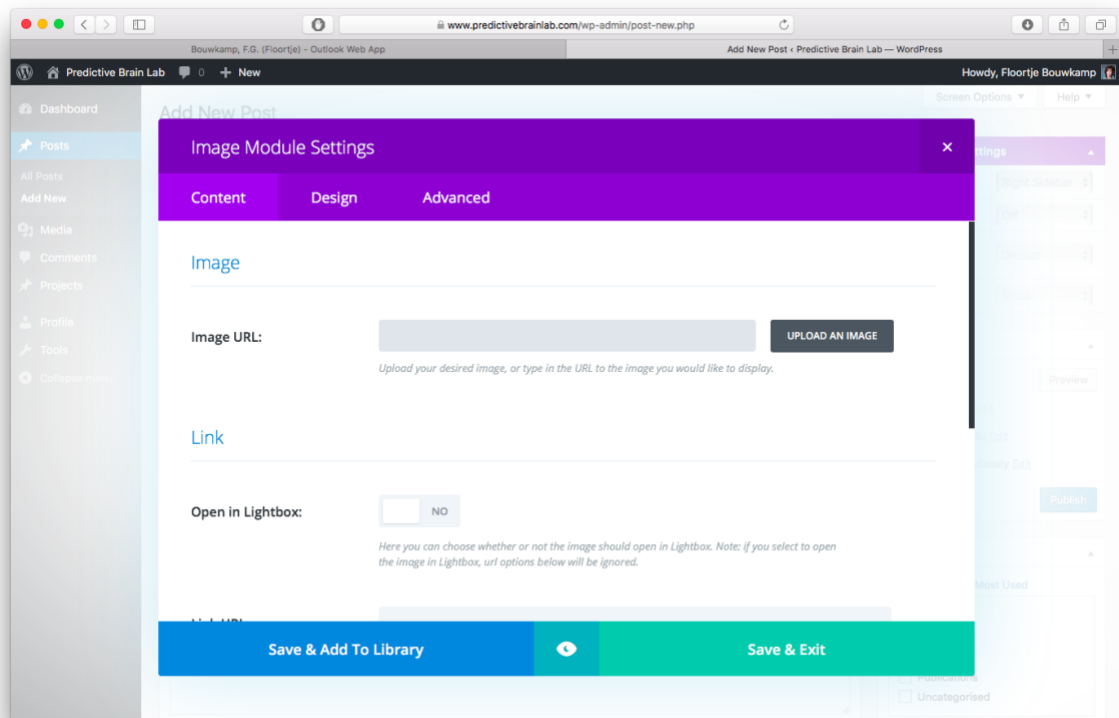

Now the basic lay out is there with a grey bar that says 'image' and one below that says 'text'

Click on model settings in the image bar :

select upload image (there is an image already there, ignore)

upload the file you created before

select 'set as image' in bottom right corner
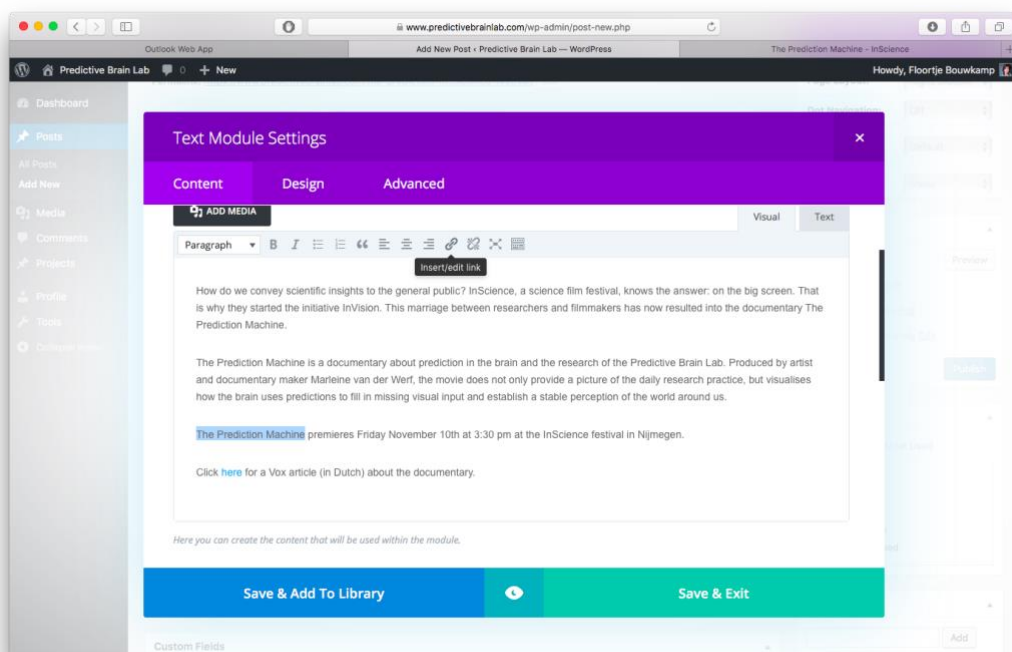

choose Save & Exit:

now click on the text module:
you are now in the text editor: you can remove the text and paste your own text
make sure formatting is set at 'paragraph'
if you want to add a link select a piece of text, click on the paperclip symbol and enter url:

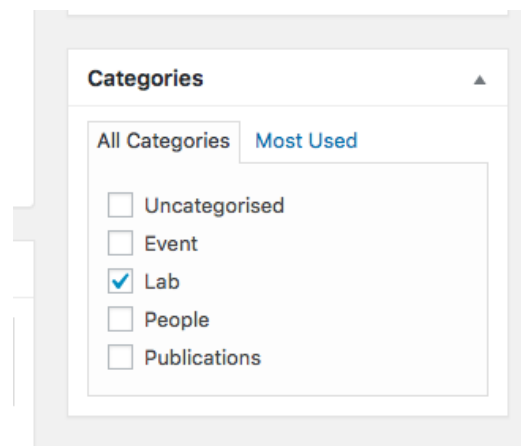

click on save & exit

You are nearly done, go to bottom right to set feature image: (click on it)

choose the same image again from the library (no need to upload)
and choose set feature image right bottom

Go to categories and select the right one:

Now go to submit for Review click on button:

Congratulations! Your post has been offered for review!
Just like with science; If Floris is happy with it, it will be published soon ☺

Mind you: After approval, you can no longer edit the post.
If it needs editing contact me

Happy blogging!
